

Truphone SIM Setup

This document is a SIM card guide applicable to our DVKs – part numbers 453-00010-K1 and 453-00011-K1. The included Truphone SIM card is part number SIM-S-IO3-TRI-2-LP.

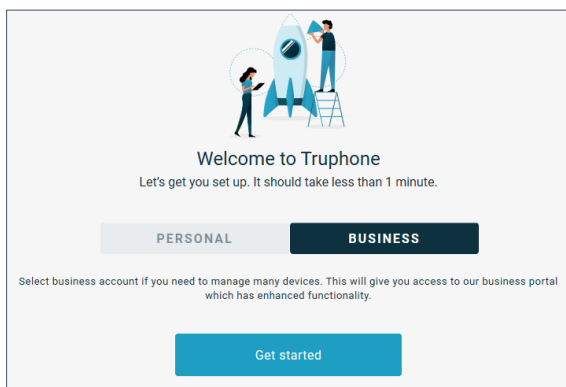

As of May 2020, Truphone only supports LTE M on this SIM card. There is no NB-IoT support. We will update this when Truphone expands support to NB-IoT. In the meantime, contact support@lairdconnect.com if you want to test with NB-IoT.

To set up your Truphone SIM, follow these steps:

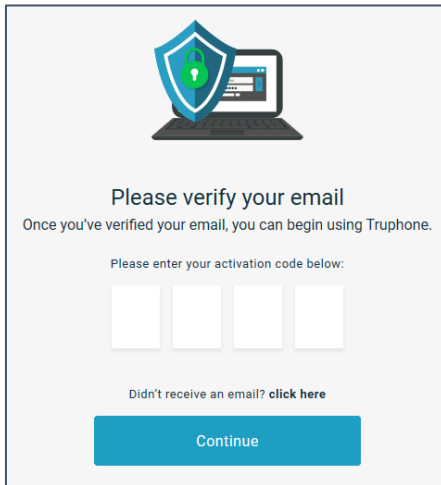

1. Visit truphone.com/connectit.
2. Unless you already have an account, click **Sign up** located at the bottom of the LOG IN window.

A screenshot of the Truphone login interface. At the top, the Truphone logo is displayed. Below it is a white box titled 'LOG IN'. Inside this box are two input fields: 'Business email *' and 'Password *'. The password field has a toggle icon for visibility. Below the password field is a link that says 'Forgot password?'. At the bottom of the login box is a blue button labeled 'Log in'. Below the login box, on a grey background, is the text 'Don't have an account yet?' followed by a blue link labeled 'Sign up'.

3. Enter your contact information and a password.
4. Select your preferred account type (Personal or Business).
5. Click **Get Started**.

A screenshot of the Truphone welcome screen. At the top is an illustration of two people standing next to a rocket. Below the illustration, the text reads 'Welcome to Truphone' followed by 'Let's get you set up. It should take less than 1 minute.' There are two buttons: 'PERSONAL' and 'BUSINESS'. The 'BUSINESS' button is highlighted in dark blue. Below these buttons is a line of small text: 'Select business account if you need to manage many devices. This will give you access to our business portal which has enhanced functionality.' At the bottom is a large blue button labeled 'Get started'.

6. Enter the verification code that was sent to your email address.

The screen features a blue shield icon with a green checkmark and a laptop displaying a code. Below the icon, the text reads "Please verify your email" and "Once you've verified your email, you can begin using Truphone." A prompt "Please enter your activation code below:" is followed by four empty input boxes. A link "Didn't receive an email? click here" is positioned above a blue "Continue" button.

Please verify your email

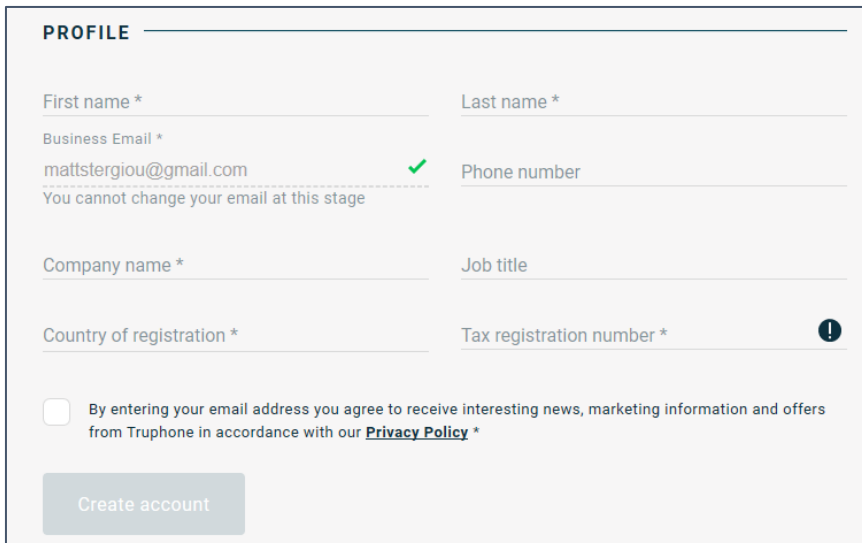

Once you've verified your email, you can begin using Truphone.

Please enter your activation code below:

Continue

7. Enter your profile information and click **Create account**.

The screen is titled "PROFILE" and contains several input fields: "First name *", "Last name *", "Business Email *" (with the value "mattstergiou@gmail.com" and a green checkmark, and a note "You cannot change your email at this stage"), "Phone number", "Company name *", "Job title", "Country of registration *", and "Tax registration number *" (with an information icon). A checkbox for marketing consent is present, along with a "Create account" button.

8. Select **Activate SIMS**.

The screen shows a person on a rocket with the text "Account creation successful" and "You are now ready to take over the world one SIM at a time. What would you like to do now?". Two buttons are at the bottom: "ACTIVATE SIMS" and "VISIT MY ACCOUNT".

Account creation successful

You are now ready to take over the world one SIM at a time. What would you like to do now?

Activate your IoT SIMs by selecting a Truphone for Things data plan.

ACTIVATE SIMS

Keep track of SIMs, payments and plans from your Truphone for Things account.

VISIT MY ACCOUNT

9. Enter the ICCID and PUK located on the SIM card

ACTIVATE SIMS

Enter your activation code to bulk-activate your SIMs. If you haven't got an activation code, enter and submit the ICCID from each SIM individually before continuing.
