PENTAIR-485-SP	ConnexLink 900Mhz RS485 (Custom)
0650-00005	Accessory – External Power Supply for CL products

DESCRIPTION OF CHANGE:

A component in these products' DC – DC circuit was made obsolete by the manufacturer, ON Semi # CS51413EDR8G. Laird has redesigned this piece on these products and successfully completed a Class I Permissive Change (C1PC) with the FCC. This work has led to a new external power supply being specified and supplied with these products.

REASON FOR CHANGE:

The change was caused by the obsolescence of ON Semi part # CS51413EDR8G. The external power supply has been changed to improve overall lead times for the products.

ANTICIPATED IMPACT OF CHANGE:

None.

The information in this document is subject to change without notice.

METHOD OF IDENTIFYING THE CHANGED PRODUCT:

There are two methods to identify if the products have changed:-

- i) Each product has a label placed on the enclosure, as per the below image. Any new production builds of the listed ConnexLink products will have three numbers on this label. These numbers increment with every manufacturing build, starting from 013 onwards.

- ii) The supplied external power supply will look different to prior shipments:-

BEFORE

AFTER

FACTORY EFFECTIVITY DATE:

Production units with this change will start being manufactured and supplied from March 2018. Depending on Laird and Distributor stock positions and shipment schedules, it maybe some time following this date that end customers will receive changed products.
